

Following are the steps to install and configure MNT Codec Packs.

Download and install the latest version of MindManager and MediaNoteTaker.

Download and install the MediaNoteTaker Codec Pack you received in the email. These are the recommended codec packs for audio and video recording and for better video quality.

There are Four Codec Packs:

1. Webm direct show filters
2. Opencodecs_0.85.17777.exe
3. Ffdshow (webmdshow)
4. Xvidcodec

Name	Size	Packed	Type	Modified	CRC32
..			File folder		
ffdshow_rev3949_20110725			File folder	03-Oct-11 8:20...	
opencodecs_0.85.17777			File folder	03-Oct-11 8:21...	
webmdshow-0.9.12.0-20101216			File folder	03-Oct-11 8:21...	
Xvidcodec.exe	652,333	627,470	Application	22-Jul-11 1:54 ...	B3BED7CC

Install each of these **WITHOUT** changing any default settings. Just click next until the installation completes for each installation pack install.

Webm direct show filters

Right click on "install_webmdshow.exe" and select "Run as Administrator. **Do not install the makewebm and playwebm .exe files**

Opencodecs_0.85.17777.exe

Right click on "opencodecs_0.85.17777.exe " and select "Run as Administrator"

ffdshow

Right click on "ffdshow_rev3949_20110725.exe" and select "Run as Administrator"

Xvidcodec

Right click on "Xvidcodec.exe " and select "Run as Administrator"

After installation of all codec packs, restart your system.

If you experience any issues with codec installs please ensure all Windows administrator rights and UAC are deactivated and then install the codec packs.
